

1. Title	BIG DATA MINING AND ANALYTICS
2. Description	<p><b>Purpose:</b> Briefly introduce to the wider public alternative solutions for the development of the urban environment about the Bid Data Mining and Analytics</p> <p><b>Objective:</b> Promote and cultivate the Bid Data Mining and Analytics to enhance the knowledge of the public about the impacts it can have on the social, environmental and economic sectors on a macro and micro scale.</p>
3. Outcomes	Develop a basic understanding for the Bid Data Mining and Analytics
3.1 Knowledge	<ul style="list-style-type: none"> <li>• Develop critical thinking and critical knowledge</li> <li>• Recognize key problems and opportunities that are directly and indirectly related to the urban development</li> </ul>
3.2 Comprehension	<ul style="list-style-type: none"> <li>• Understand the concept of the Bid Data Mining and Analytics for a sustainable urban development</li> <li>• Understand the needs of the world towards the adoption of Bid Data Mining and Analytics</li> <li>• Understand the methods and techniques for enhancing an urban environment to the Bid Data Mining and Analytics</li> </ul>
3.3 Application	<ul style="list-style-type: none"> <li>• Apply procedures and techniques for the implementation of the Bid Data Mining and Analytics</li> <li>• Implement European Union legislative frameworks</li> </ul>
3.4 Analysis	<p>We work in creating an initiative to educate learners about it and how they can contribute to achieving them.</p> <ul style="list-style-type: none"> <li>• Analyze the needs, characteristics of urban environments (case by case) and find alternatives towards the implementation of an alternative to the current non-sustainable city development methods</li> <li>• Analyse the potential impacts that may arise by adopting new techniques</li> </ul>
3.5 Synthesis	The course aims to offer knowledge to the general public in a self-paced online structure with the hope of increasing participation in the work being done towards these goals. The courses often

	<p>provide expertise with NGOs or international organizations working towards the promotion of sustainable development. The PULCHRA project and OUC hope to offer a global education on these goals and ways to get involved.</p> <ul style="list-style-type: none"> <li>• Find solutions for the current situation of the world</li> <li>• Identify existing solutions already implemented</li> <li>• Combine theory and practice to improve society and the environment</li> </ul>
3.6 Evaluation	<ul style="list-style-type: none"> <li>• Evaluate methods and techniques for implementing the Bid Data Mining and Analytics in the urban environment</li> <li>• Assess the impact of Bid Data Mining and Analytics in the society, economy and the environment</li> </ul>
4. Keywords	Society   Environment   Economy   Science   Health   Well-being   Bid Data Mining and Analytics
5. References	<ul style="list-style-type: none"> <li>• Tutorial: Big Data Analytics : Concepts, Technologies, and Applications ( Watson, 2014)</li> <li>• Understanding Big Data (Sakyi, 2016)</li> </ul>
6. Self-assessment	<ul style="list-style-type: none"> <li>• What measures would you implement relevant with Big Data Mining and Analytics?</li> <li>• What implications does Big Data have on the evolution of environment?</li> </ul>
