

Kuldiga Technology and tourism technical school

Project description

The City Challenge

Regenerating Urban Space to connect People in a Healthy Environment

What is our question?

How to make Kuldiga better known as UNESCO heritage city?

What is the possible answer?

The aim of the project - in cooperation with Kuldiga municipality to promote Kuldiga as UNESCO heritage city by creating an interactive story map about Duke Jacob time in Kuldiga. The map would be freely accessible and usable by local community and city guests.

Our solution

In co-operation with Kuldīga municipality, promote Kuldīga as a UNESCO heritage city

Our path

Students, teachers, expert from Kuldiga Development Agency worked together to realize different activities. Some of them:

Online meeting on 28th of January 2020 for science team. Discussion about project and planning online CC event. Expert from Kuldiga Development Agency explained details about technical part of the project.

Unfortunately there was not possibility to finish the work on CC1 due to COVID 19 and distant learning as the students of this vocational school are from all around country and learned from their home town, so no real possibilities to come together in Kuldiga to implement the project. The team decided to continue their work during CC2.

Where you can find the main results?
