

City Challenge Report Card			
The City Challenge Theme		Neodpadni (Don't litter) 4. From waste disposal to Resource Efficiency – Circular Economy at the City Scale	
School/Summer School		Gymnázium Praha 4, Postupická 3150, Prague 4, 14100	Teacher(s) / Disciplines Jitka Bártová (Eng-geography), Jana Srbová (Eng- social science), Karolína Stríbná (Biology-chemistry)
The planning phase	Problem (The What-question)	Waste issues in the locality of Prague - Spořilov	
	Relevance (The Why question)	Overcrowded dustbins, lack of containers	
	Expectation / Hypothesis	Improvement of the situation, increase in the number of containers, overall improvement of the environment	
	Methods (The How-question ¹)	Questionnaire survey, communication with local citizens, communication with authorities and experts	
	Participants ² (The Who-question)	High school students - environmental seminar (3rd year and 5th year) Teachers (see above) Scientists from PřF UK - expert guidance when working with GIS	
The implementation phase³	Activity 1 (e.g. literature, book review)	Studying during the hours of an environmental seminar	
	Activity 2 (e.g. gather data / information)	Creating a questionnaire based on own information, information from fellow citizens and teaching at the seminar + processing of the information obtained and its evaluation	
	Activity 3	Communication with the public, local municipality Online open event	
	Activity 4	Creation of maps	
	Activity 5	Open event - adapted to the conditions of the coronavirus pandemic - Students (participants of PULCHRA) placed leaflets in various places (Mtš, primary schools, bulletin boards of the office) with an appeal to families with children and other citizens of Spořilov to clean the district individually. These citizens were then asked to fill in the attached questionnaire and send the information about their cleaning activity by e-mail to the students. Unfortunately, no one responded, so we do not know if anyone participated in the challenge.	
	City Challenge solution	Map of the location of containers, submission of a proposal to improve the availability (time required to access containers) of waste sorting containers presented to local municipality officials	
The documentation and reporting phase	Group or class (e.g. reports, posters etc)	Production of information leaflets on sorted waste - their lamination and placement close to containers	
	School (e.g. school web page, school newspaper)	School website – www.postupicka.cz School magazine - Single https://www.facebook.com/postupicka.cz/	

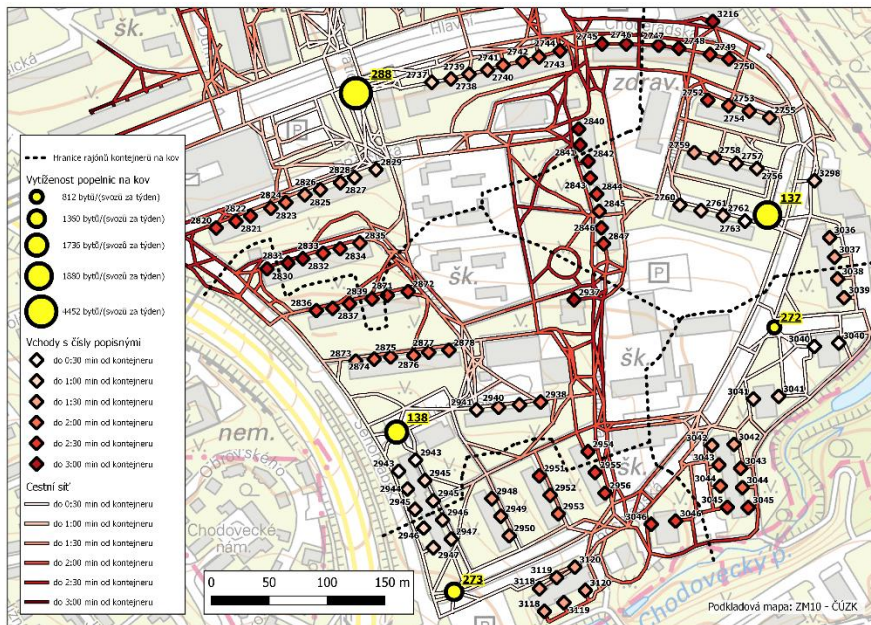

¹ Please provide the keywords regarding both, the teaching approach and the research approach

² E.g. the science team members

³ Please provide support if possible through pictures, sketches, charts, student reflection or such

	<p>Public (e.g. meeting, news media)</p>	<p>Distribution of flyers inviting to the 1st open event - online meeting</p> <p>Online public meeting</p> <p>Preparation of an article for the national competition of the Young Reporters for the Environment programme</p> <p>Presentation at the Open Science Together Inspirational Session.</p> <p>Meeting with employees of the Prague 4 municipal district - presentation of the project and presentation of proposals to improve the situation with sorted waste in Spořilov. Discussion of the proposed solutions.</p> <p>Final public questionnaire on the project NeODPADNI - presented on Facebook</p> <p>Article for PULCHRA blog</p>
--	--	---

Room for additional explanations (some feedbacks on main problemes found and related solutions, orother observations are very appreciated)
